ESTHER TEH

Since the dawn of humanity, humans have looked to the skies and stars above for guidance. The Encyclopedia Britannica defines Astrology as "a type of divination that involves the forecasting of earthly and human events through the observation and interpretation of the fixed stars, the Sun, the Moon, and the planets."

Generally, Babylonians have been credited with the birth of astrology, which was primarily used to predict weather patterns for agricultural purposes. The forefathers of this age-old practice believed that the sun, moon, and the five planets known at that time (*Jupiter, Mars, Mercury, Saturn* and *Venus*) possessed distinct powers.

However, it was during the ancient *Hellenist* period (323-31BC) when Greek thought and philosophy ruled dominance that the study, development and acceptance of astrology truly flourished under the embrace of several prominent thinkers of those days. This was when the roots of horoscope, zodiac signs and individualized astrology as we recognize it today first came into existence.

Throughout centuries, interest in astrology underwent periods of neglect and revival, but it never quite faded from public existence.

Around 150-180 years ago, interest in this ancient practice started to resurge into the consciousness of Western culture and has since taken flight throughout the world.

Today, most people know their zodiac sun signs and millions read their daily horoscope!

Meet Esther Teh, Glow's very own astrologer.

What is Astrology?

It is a much misunderstood issue and commonly labeled as "fortune telling".

There are actually many ways to use Astrology, from personal development, health development, career charting, investments to love relationships (and many more!). Astrology is a great tool in providing insights into your destiny, personal growth and development.

In other words, find out how you may be sabotaging yourself at work and in relationships.

CONSULTANT FEATURE

Larry finally saw the stars after a crash course on Astrology.

By tapping your level of awareness, you can increase the quality of your living and enjoy it to the fullest.

Using your birth details, an informed Astrologer will be able to determine the planetary placements of your natal chart which reveals the challenges one faces in this lifetime, along with the potential each individual is endowed with.

In short, it is a good compass for a long journey of the landscape of the mind.

Who is Esther Teh?

Esther's interest in the Science of Astrology, Numerology and Gemstones began at a very young age and she was schooled in the Science the old-fashioned way, through self learning as well as tutelage under various masters.

Personal experience coupled with research taught her that while human beings are capable of ignoring the truth, the science of Astrology and Numerology provide insights which are difficult to ignore.

She has been using her knowledge and skill to help people gain a better understanding of themselves as well as provide tools on their journey to self-love.

A robust sense of humour and a down to earth demeanour makes her workshops an interesting and unique experience not to be missed!

She has conducted many workshops for both private & corporate engagements. Her recent 6-day participation at *Club Med Ria Bintan's "Body Mind and Soul"* 2005 program was very well received by visitors and staff alike. She also travels to the USA to conduct workshops and consultations and writes for various top magazines locally. She is currently authoring some books on the *Sciences (Astrology, Numerology and Geminology)* in a simple easy to understand format, so that all might benefit from her knowledge. ☺

With stars like that, small wonder why Van Gogh screwed his life.
